ENGINEERING STATEMENT

**IN SUPPORT OF
PETITION FOR RULE MAKING**

BY:

VOX NEW YORK, L.L.C.

February 2001

PURPOSE AND SCOPE

The Petition, of which this Statement is a part, requests a modification of the F.C.C. FM Table of Allotments in 47 CFR 73.202 by deleting the allotment of channel 228A at Corinth, NY, adding an allotment 229A at Scotia, NY; deleting the allotment of channel 296A at Hudson Falls, NY, and adding an allotment 296A at Corinth, NY. The results of these changes are WHTR(FM)'s (FCC Facility ID 64620) principal community changes from Corinth, NY (on channel 228A) to Scotia, NY (on channel 229A) and WFFG-FM's (FCC Facility ID 49716) principal community changes from Hudson Falls, NY to Corinth, NY (both on 296A). This Statement supports the Petition by showing that the new allotments comply with applicable spacing requirements, provide 70 dBu coverage to the principal communities of the new allotments, provides 60 dBu coverage to more area and population than is provided by the present allotment scheme and that the proposed allotments are mutually exclusive with the present allotments.

ALLOTMENT SPACING

CHANNEL 229A AT SCOTIA, NY

A computerized search of the F.C.C.'s CDBS FM database shows that an allotment site specified at N42-54-56, W74-02-28 is fully spaced per the requirements of 47 CFR 73.207(b)(1) to all domestic stations/allotments. The site is also fully spaced per the requirements of 47 CFR 73.207(b)(2) to all Canadian stations/allotments.

CHANNEL 296A AT CORINTH, NY

A computerized search of the F.C.C.'s CDBS FM database shows that an allotment site specified at N43-14-40, W73-46-18 ^{1/} is fully spaced per the requirements of 47 CFR 73.207(b)(1) to all domestic stations/allotments. The site is also fully spaced per the requirements of 47 CFR 73.207(b)(2) to all Canadian stations/allotments.

^{1/} The proposed allotment coordinates for 296A at Corinth, NY are also the licensed transmitter site coordinates of WFFG-FM.

PRINCIPAL COMMUNITY COVERAGE

Plotted on Figure 1 is the outline of the corporate boundary of Scotia, NY, and a portion of the 70 dBu F(50,50) contour generated by full Class A facility at the proposed Scotia allotment site. As shown, the principal community lies completely within the proposed 70 dBu contour.

Plotted on Figure 2 is the outline of the boundary of the village of Corinth, NY, and a portion of the 70 dBu F(50,50) contour generated by full Class A facility at the proposed Corinth allotment site. As shown, the principal community lies completely within the proposed 70 dBu contour.

PRESENT VERSUS PROPOSED SERVICE

The present WHTR(FM) facility's 60 dBu contour encompasses an area of 1804 square kilometers and 135,036 persons. The 60 dBu contour from the proposed operation of Channel 229A in Scotia, NY encompasses 2524 square kilometers and 489,581 persons.

The present WFFG-FM facility's 60 dBu contour is identical to the proposed operation of channel 296A at Corinth, NY, so no change in coverage from channel 296A results from the changes proposed herein.

A modification of the Table of Allotments, as proposed in this Petition, will result in an increase in 720 square kilometers (39.9% increase) receiving 60 dBu service from WHTR(FM). The total population receiving 60 dBu service will increase by 354,545 persons, a 262% increase. WHTR(FM)'s proposed operation on channel 229A will provide first local aural service to Scotia, NY (1990 Census population - 7,359). Corinth, NY (1990 Census population - 2760) retains its first local aural service with the substitution of channel 296A for channel 228A. Hudson Falls, NY will maintain a first local aural service from WENU-FM.

PROPOSED COVERAGE OF URBANIZED AREA

A full Class A facility located at the proposed Scotia allotment site provides 70 dBu coverage to less than 25% of the total area and population of the Albany-Schenectady-Troy Urbanized Area. Of the three major cities defining the urbanized area, only a portion of Schenectady would receive 70 dBu coverage from the proposed allotment.

ALLOTMENT IMPROVEMENT

The present channel 228A allotment at Corinth is a grand-fathered 3.0 kW at 100 meter allotment. The allotment cannot be upgraded to a full Class A (6.0 kW, 100 meters) at any location that would serve Corinth due to numerous short spacings under the present requirements of 47 C.F.R. 73.207. The proposed allotment of 229A at Scotia is a full 6.0 kW 100 meter allotment.

MUTUAL EXCLUSIVITY

The proposed allotment site for 229A at Scotia, NY is separated by 42.6 km from the present 228A allotment site at Corinth, NY. The minimum distance separation required between first-adjacent Class A facilities is 72 km. No sites exist in the Corinth and Scotia areas that would allow the simultaneous operation of channels 228A at Corinth and channel 229A at Scotia.

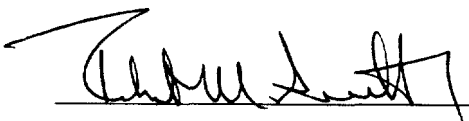

The proposed allotment site for 296A at Corinth, NY is only 5.5 km from the present allotment site for 296A at Hudson Falls, NY. Co-channel class A facilities must be separated by a minimum of 115 km. No sites exist in the Hudson Falls and Corinth areas that would allow channel 296A to be allotted to both communities.

REMAINING SERVICES IN CORINTH

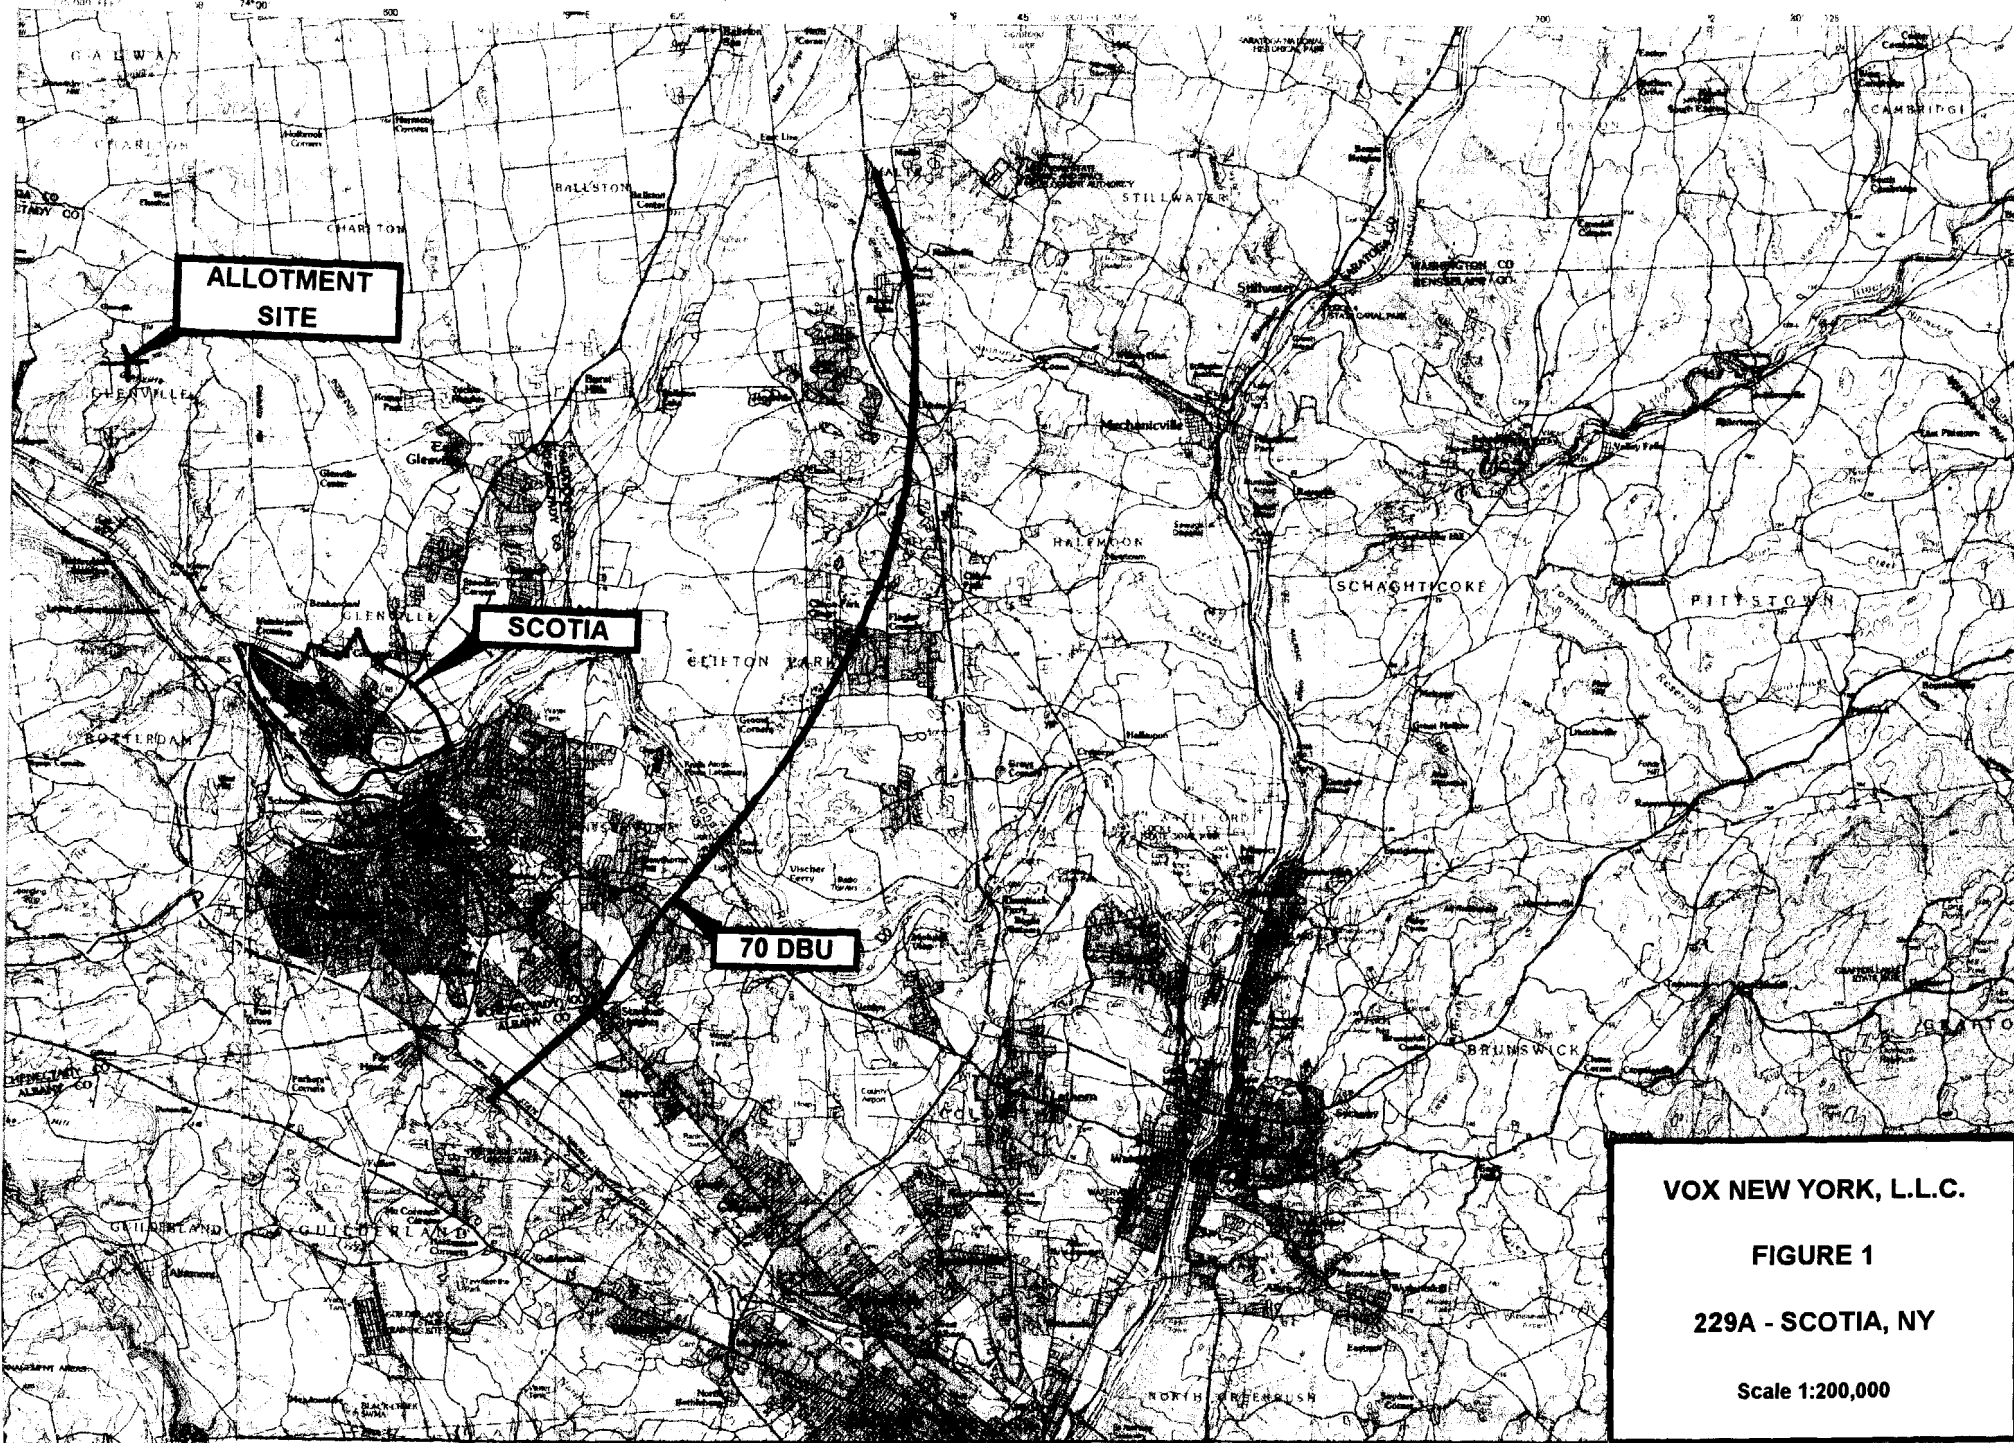

Following the removal of channel 228A from Corinth, the present WHTR(FM) 60 dBu coverage area will continue to receive a minimum of five aural services.

CERTIFICATION

I, Robert M. Smith Jr., of Port St. Lucie, FL, do hereby certify that all of the data, calculations and statements in this application are true and correct to the best of my knowledge and belief. I further certify that I am an experienced and qualified broadcast engineer and that my qualifications are a matter of record with the Commission.

A handwritten signature in black ink, appearing to read 'Robert M. Smith Jr.', written over a horizontal line.
